Donate monthly to
Wellington Free
Ambulance

From the Head of Emergency Ambulance Services

Kia ora, I'm Kate.

Did you know that regular, ongoing donations go towards providing essential healthcare services? Demand is growing every single day, month, and year for our Emergency Ambulance Services – and our costs are growing too.

In the last year, our frontline crews responded to 860 more incidents than the year before – that's an additional two incidents every day of the year.

This is why your regular and ongoing donations are so important in helping us meet this growing demand.

On behalf of Wellington Free Ambulance and the frontline paramedic crews, thank you for your support – it's deeply appreciated.

Kate Worthington
Head of Emergency Ambulance Services

In the last year, our frontline crews responded to 860 more incidents than the year before – that's an additional two incidents every day of the year.

Be a Community Champion

By regularly donating to Wellington Free Ambulance on an ongoing basis, you're helping us be here for thousands of people in the Greater Wellington and Wairarapa region.

It's thanks to this essential support for the community that we call you Community Champions!

As a regular and ongoing donor, you're an essential member of the Wellington Free Ambulance team. As a 24/7, 365 days a year service, we need to be here year-round – that's why we need your year-round support.

Your regular and ongoing donations ensure everyone in our community can access emergency ambulance care, when they need it most – free of charge. Thank you for your life-changing support.

HOW YOUR REGULAR DONATIONS ARE USED

Regular, ongoing donations are used to fund many of the general costs of our work that is not covered by our government funding – including things like:

- Equipment like stretchers, defibrillators and other lifesaving equipment our paramedics need.
- Paying for essential costs of our service like vehicle maintenance, fuel, station maintenance costs – providing our paramedics with the resources they need.
- Infrastructure that supports our entire team in the community- like stations, IT equipment, etc.

Regular donations help to fund

Fully kitted out Critical Care vehicles. These essential vehicles provide specialist medicines and emergency response, wherever an emergency ambulance crew may be. Costs include:

- All medical equipment
- Customised storage and fit-out
- Lights and sirens
- Wellington Free livery

Blood glucose monitor to measure blood sugar
- \$40

An electronic thermometer, used with almost every patient
- \$400

Used in 98% of call outs, Corpuls defibrillators are essential - \$35,000

Powered stretchers help keep our people and our patients safe
- \$56,000

The impact of regular, ongoing donations

Each year we must raise \$8 million from the community to ensure we can be here when people need us most, free of charge – your regular and ongoing donations form a crucial part of this.

Your regular and ongoing donations are used to provide essential healthcare services, including our Emergency Ambulance Service.

An emergency ambulance call-out, on average, costs \$650.

Last financial year, regular and ongoing givers donated around \$637,000 – that's 980 emergency ambulance responses they helped fund this year alone. Each of those people that we helped during those call-outs are parents, grandparents, children, friends and loved ones. They might be someone you know or care about. Thanks to this support, they got the help they needed at no cost to them.

Meet your team of Community Champions

When you donate to Wellington Free Ambulance on a regular, ongoing basis, you're joining a team of like-minded, committed donors.

Have a read of just some of the reasons why our incredible team of Community Champions decided to donate to Wellington Free.

MICHAEL AND BRONWYN'S STORY – “WE'RE SO GRATEFUL FOR WHAT WELLINGTON FREE DID”

“We decided to donate to Wellington Free because of our son, Sam.

Back in 2017, he was working when he collapsed. The fire brigade and Wellington Free took care of him. They worked on him for quite a long time, including restarting his heart with an AED [*automated external defibrillator*]. He got through that. Over the years, Sam needed repeated defibrillation, and the ambulance always turned up.”

To know that we have people like that in all our lives is so comforting

- Georgie

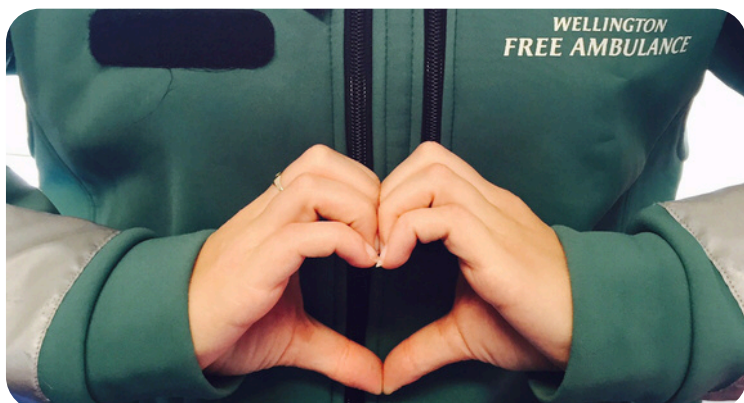

Their compassion, integrity and professionalism really struck me

- Mary

I always remember how kind everyone was
